BACKGROUND & OBJECTIVE

An international student who is pursuing further study in software engineering field in Canada. With previous work experience in the banking industry.

Looking for part-time opportunities to equip myself with working experience in Canada before graduation.

WORK HISTORY

May 2017 – Sep 2022

Technical Lead (Application Development) | The HK Jockey Club

- Develop and maintain the club's backend system database.
- Share and provide technical or operation guidelines to teammates and related parties.
- Provide production support and investigation in case of incidents.
- Employed and seconded by CMS Asis Limited in the 1st year and became a direct employee of the Jockey Club since then.

Apr 2015 – Apr 2017

Senior Development Officer | HSBC

- Develop and maintain the bank's Customer Correspondence Delivery system, which is handling customer statements and important documents.
- Provide production support and investigation in case of incidents.

Aug 2009 – Apr 2015

System Analyst | MUFG Bank (Formerly Bank of Tokyo-Mitsubishi UFJ)

- Develop and maintain the bank's core banking system for general business. For example, deposit, fund transfer, cheque clearing and account balance reconciliation, etc.
- Perform As-Is analysis of the Core Banking System replacement project, to study, organize and document the current system behaviors and requirements.
